Weighted decay through t = 256
A plateau is consistent with the proposed power; continued growth needs further testing
Gaussian
Homogeneous
0.00999
Near-degeneracy packet
Homogeneous
0.00888
Gaussian
Inhomogeneous
0.00372
Near-degeneracy packet
Inhomogeneous
0.00586
Decay ratio R(t), in units of 0.001
Evolution time t (each step doubles time)
